

Douglas Scott

Sylvina, I was up on the Druim Mor ridge yesterday replotting the cupmarks that Bob Gourlay and I found 25 years ago and came across a 40m wide ditched enclosure. Its grid is NH 5751 6615. The ditch is about 2m wide by about 0.5m deep and is best on its south east side. There is no sign of an entrance but the road has cut through the enclosures western side. Just south of its centre there is a 1m high earhfast standing stone and a large boulder has five cupmarks and a deep hole on its top. It's likely that the boulder has been moved. There are also what looks like the remains of a few round houses within the enclosure. Google Earth shows quite a number of other round houses scattered around the fields to the east and west, so it must have been quite a sizeable village.

Highland Historic Environment Record Thanks Dougie. Can I please clarify, is this definitely to the west of and outside the scheduled area shown on our HER map close to this location?

Highland Historic Environment Record via Royal Commission on the Ancient and Historical Monuments of Scotland

On 6th and 7th October two walks will be led by Simon Green, architectural historian at RCAHMS, to raise awareness of a new community project being launched in the area. People are invited to join Simon on one or both days to discover and discuss how the towns developed.

'Understanding Aviemore', Thursday 6th October: meet at 2pm at Aviemore Railway Station.

'Understanding Kingussie', Friday 7th October: meet at 10.30am at Kingussie Railway Station.

More on that Iron Age hearth deposit from near Laggan:

Highland Council HER - by exeGesIS SDM

her.highland.gov.uk

The ruinous remains of a dry stone structure/building with possible hearth identified during an archaeological evaluation. Radiocarbon dating has returned a probable Early Iron Age for the hearth.

A recent walkover survey on Skye by West Coast Archaeological Services, working with Ross and Cromarty Archaeological Services, resulted in no less than 178 new sites being added to the HER. Take a look at <http://bit.ly/rf6b8w> . The surveyed area was totally blank on our maps before!
