SMR

ARDVRECK CASTLE, Loch Assynt

NC 22 SW.

Visited by JH 20/4/94. Photographs.

In serious need of consolidation. 1 carload + 1 camper van full of German tourists were climbing over it when I arrived, despite "Dangerous Building" sign.

Preventing public access is virtually impossible - people will insist on going over to it.

Noted very rough attempts to "repoint" parts of the structure in the past using Portland Cement.
