"NC 4116 1121. Broch." (1)

"The remains of a broch set on the slop of the hill, with the ground falling sharply from the site on the N and E. The interior is filled with debris the wall being nowhere visible for more than 5ft above it, reaching a max.height of 11ft externally and about 17ft internally on the NW. The S has been heavily robbed to build sheepfolds. The entrance passage in the E is still intact at its inner end and is 18ft 6ins long, with a guard chamber on the N. An oval mural chamber 7ft S of the entrance is entered from the central court, as is a gallery which is visible within the wall on the S and W." (2)

"The broch still stands to a height of 3.5m on the NW and has an overall diam. of 17.8m. The broch is as described above, although none of the internal features are particularly well defined, all being obscured by tumbled stones." (OSFI:JB:30.9.1976)

"NC 411 112. creich, Broch, 1600m NW of, Glen-Cassley" (3)
