52 TEXT

"(NC 87200199) Hut Circle." (1).

"Some 250 yards NW of the monument to James Lock in Uppat Wood is a hut circle of simple form, with its entrance from the SE. Its dimensions are 36 ft by 32 ft within a bank 8 ft thick. The whole is overgrown with heather." (2).

"At the base of an uprooted tree on the S side are disclosed a number of shells of edible molluscs." (2).

"As described above." (OSFI:EGC:4.4.1962).

"An oval hut situated in a coniferous wood and generally as described by the RCAHM (2). The greater dimension is on a WNW-ESE axis. The apparent entrance is in the ESE and that segment is much mutilated. The hut has been planted over with trees.

There are no traces of contemporary cultivation."

(OSFI:JM:21.8.1975).
