"A": NC 80522627 ; 'B': NC 80682633; 'C': NC 80682631; 'D' : NC 80352636; 'E': NC 80132649; 'F': NC 80102647. Hut Circles." (1)

"A settlement of six hut circles with field clearance, stretching along the lower south slopes of Tomich. Huts 'A', 'B' and 'C' are circular, 10.0m to 11.0m in diameter internally with entrances in the SE. 'A' and 'C' are of turf but 'B' is of earth and stone with external facing stones on the south arc. The banks vary from 0.2m to 0.4m in height and 3m to 4m in breadth. Huts 'D', 'E' and 'F' are of turf, oval and scooped into the hill-slope, with entrances in the SE. They measure internally from 12.5m by 11.0m to 14.5m by 12.0m with banks from 0.3m to 0.4m high and 3m broad." (OSFI:WDJ:25.5.1961)

"This settlement comprising five hut circles ('A', 'B' and 'D' - 'F') is generally as described by OSFI (above). 'C' is a fortuitous arrangement of natural features; it does not

(OVER/

52. "exhibit the usual degree of levelling associated with hut circles, the outer 'bank' enclosing a diameter of about 10.0m appears to consist solely of peat, clearly exposed in the N arc. The centre of the feature is overlaid with turf-covered stones, probably clearance. A minor field system of approximately seven hectares surrounds the huts. It is defined by scattered clearance heaps and a few lynchets. No clearly defined plots were seen.

(OSFI:JB:21.2.1976)
