2 TEXT

"ND 1035 6160. Mound."(1) "On the summit of a grassy hillock stood a broch. The hillock seems to some extent to be artificial; it has a diameter overall of about 146ft(44.81m) and is some 10(3.00m) to 12ft(3.67m) high. No part of the structure is visible, but the portion of the mound which seems to have contained the tower measures some 70ft(21.44m) in diameter."(2) "Classified as a broch."(3) "The grass-covered mound, which measures 46.0m in diameter and 4.0m in height appears to be the remains of a broch although there is no definite proof of this, apart from its overall size and a slight depression in the top, 11.0m in diameter. In the N, a considerable section of the mound has been removed."(OSFI:RD:16.2.1965)

52. "ND 1035 6160. Broch."(4)

"There seems little doubt that this is a broch displaying the 'mound-on-mound' effect common to Caithness, although the profile has been smoothed, the mound spread and then truncated by ploughing. The broch-mound is about 19.0m in diameter and 1.0m high with an undulating depression 0.3m deep, in the centre. No wall faces are exposed, and pieces of friable slab are visible protruding through the mound here and there. The larger mound is as described by the previous field investigator."(OSFI:NKB:15.2.1982)

"ND 103 616 NORTH CALDER, BROCH 600M W OF" (6)
