"(ND 2121 3591): Appnag Tulloch Broch (remains of)." (I)

"Appnag Tulloch: The grass-covered ruins of a broch lying on rock outcrop. Excavations in 1910 revealed the entrance passage on the W. The broch has been about 60ft(18.40m) in overall diameter with walls 12 to 13ft (3.67.to 4.07m) thick. The mound is about 8 ft (2.44m) high. At the edge of the rock on the E are the remains of a breastwork which has commanded the easy gradient of approach. On the W, in front of the entrance, disturbances indicate the existence of outbuildings. To the NW two or three large slabs set on end protrude from 1 to 2½ ft(0.305m to 0.76m) above ground, but the 'Standing Stones' published (at ND 2120 3590) on the OS map are no longer visible." (2).

"Appnag Tulloch (name verified) is a broch with vague traces of outbuildings, as described by the RCAHM."

(OSPT:NKR:12.5.1967).

(over).
