"ND 219 653. The remains of the long cairn on the top of Cooper's Hill are slight. There are few signs of stones and the site is now a low mound rising only 1ft(0.305m) to 2ft(0.61m) above the field and covered with the same turf. The long axis lies NW-SE and the latter end is slightly higher. It measures about 200ft(67.21m) long but other measurements are now indefinite."(1)(2)
