52 TEXT

"NH 71618839) Cairn (remains of)." (1).

"The remains of a cairn almost entirely overgrown with whins. It appears to have been circular, about 57t. in diameter, but, at some remote period, the interior and east side have been entirely removed." (2).

"The remains of a cairn generally as described. The west side survives as a stone and earth bank 6m. in maximum width and 1.5m. high. Elsewhere the cairn has been almost levelled and the whole site is grass and gorse covered."
(OSFI:RDL:6.6.1963).

"No change to preceeding reports."
(OSFI:JM:18.9.1980).
