52 TEXT

"(NH 7610 9326) Carn an Fhéidh." (1).

"A circular cairn, with a diameter of about 56', and a height of from 5' to 6', broken into in several places, but neither cist nor chamber is exposed." (2)

"A cairn of bare rubble stones on the brink of a S-facing slope. Slightly oval on plan it measures c.20.5m NW-SE by c.18.0m transversely, and c.2.0m maximum height. It is disturbed in places, but the centre is intact and there is no trace of structure. It appears to be connected to the cairn immediately to the NW (See HNH 79 SE 002) by an overgrown band of rubble c.8.0m wide, but whether this is deliberate or a result of tumble, is uncertain. Name Carn an Fheidh confirmed."

(OSFI:AA:25.3.1971).
