

“PRIDE OF STROME” FERRY – MID STROME

H.E.R. No. MHG

GRID REF. 869359

The “Pride of Strome” was built in 1962 by Forbes of Sandhaven. She is 16m long x 5m wide and was one of the last two ferries operating between Strome and Stromeferry which stopped upon the opening of the road by-pass in 1970.

At low tide the sailings had to be suspended for some three hours! So in 1956/7 the jetties were extended to alleviate this considerable problem. Fares were increased to 10/- (50p) & 6/- (30p) for locals, to cover the cost.
